

SeyCCAT's Blue Funds are structured as three pillars.

- A. **The Blue Grants Fund** is the main revolving fund of SeyCCAT. It distributes funds through a competitive "request for proposals" basis for investments in conservation and climate adaptation projects. The BGF consists of five strategic priorities and four cross cutting themes.
- B. **The Blue Endowment Fund** is compounding year on year and will mature in 2036 with an expected value of US\$ 6-7M for investments in conservation and climate adaptation projects.
- C. **The Blue Challenge Fund** is seeking capitalisation. Once complete, SeyCCAT will announce details of competition(s) and prize(s) towards inviting creative collaborations to pitch solutions to identified conservation and climate adaptation challenge(s).

Writing successful funding applications to SeyCCAT: a step-by-step guide to the Blue Grants Fund (BGF)

This guide is designed to help applicants understand the process to access the SeyCCAT BGF. BGF projects are designed and delivered by a range of partners through either:

- **Small-medium grants** up to SCR 100,000. These grants will be awarded on the basis of an approved concept note. The maximum duration of grant awards is 12 months for a small-medium grant.
- **Large grants** between SCR 100,000 and SCR 1,000,000. These grants will be short-listed on the basis of the concept note (stage 1), and then awarded on the basis of a full proposal (stage 2). The maximum duration of grant awards is 24 months for a large grant.

Each BGF Request for Proposals (RFP) focuses on one or more of our five strategic objectives (projects that do not align will not be considered). In addition, we seek projects that demonstrate alignment with one or more of our four cross cutting themes.

Each RFP makes explicit the nature of the strategic objectives that SeyCCAT is seeking to fund. SeyCCAT encourages creative collaborations and project partnerships.

The application process consists of the following steps:

Small-medium grants

Stage 1: Concept

Large grants

Stage 1: Concept

+ Stage 2: Proposal

- A. "Blue Grants Fund" Request for Proposals (RFPs) is advertised.
- B. Applicants develop project proposals and complete application forms (1st stage concept, or 2nd stage full proposal) that align to the BGF strategic priorities.
- C. Grants committee reviews proposals against screening criteria (including social and environmental safeguards) and make recommendations to SeyCCAT Board of Directors.
- D. Review and approval of recommended projects by the SeyCCAT Board of Directors.
- E. Applicants informed of the outcome of their project proposals.

Note: if a large project concept note was submitted, applicants return to stage B to develop the full stage-2 project proposal for review and approval by the grants committee and Board. For large grants, a project preparation grant could be available.
- F. Successful applicants enter into a project agreement with SeyCCAT, with funds released in tranches for project implementation.
- G. Grantees provide interim technical and financial reports to SeyCCAT to release subsequent tranches of funds.
